

HTF, Inc.  
The Furnace World's Best Kept Secret

---

Are you looking for a High-Quality Heat Treat Manufacturer?

Have questions about Heat Treat Equipment?

#### THE ADVANTAGES OF WORKING WITH HTF

- Our experience and capabilities equal the industry's best
- Our prices are generally lower
- We work with you to establish the most appropriate total concept to meet your unique needs
- We build with "off the shelf" components
- Our furnace systems can include material handling
- We have many proven concepts to work with
- We can help you to develop your ideas into equipment
- Our total project time span is generally less than that of our competitors
- We assemble and test our products prior to delivery
- In addition to building new equipment, we have the flexibility to upgrade, expand, modernize or duplicate existing equipment
- We can also locate and/or refurbish used equipment

Our products are in use in most areas of the industrial heat treating field. Our history of customer satisfaction goes back to 1977 when HTF's owner Dave Smith was asked by Texas Steel Co. to develop and build a new state-of-the-art, low maintenance Car Bottom Furnace. That effort yielded the first all-fiber door jam and started a continuing chain of innovations.
